Social Impact

Governance
Practices

BUSINESS
OUTPERFORMANCE:
ETHICAL IMPACT

ESG or Environmental, Social and Governance are three essential elements of businesses today. What was initially viewed as an added compliance, is now regarded as a vital part of business strategy. This reflects the growing appreciation of the importance of managing ESG issues as a core part of business, and the potential risks involved in ignoring them. A company's business stakeholders are increasingly considering ESG performance while determining future business dealings. The evidence is overwhelming: Good E&S management and governance improve business performance. Integration of these value-creating practices provides powerful synergy for innovation, competitiveness, and business growth

ENVIRONMENTAL

- Greenhouse gas emissions, carbon footprint
- Pollution & Waste Management
- Biodiversity, water and land use
- Depletion of resources/deforestation

SOCIAL

- Employee relations & diversity
- Equitable working conditions
- Development of local communities
- Health, safety and security

GOVERNANCE

- Board diversity and structure
- Management and internal controls
- Donations and political lobbying, corruption and bribery
- Transparency and disclosures

ESG - The Global Scenario

- The EU's Sustainable Finance Disclosure Regulation (SFDR), which came into effect in March 2021, is designed to drive capital toward sustainability oriented investments
- Corporate Sustainability and Reporting Directive (CSRD) by EU also introduces tougher reporting requirements and audits of ESG related information
- In US, SEC (Securities Exchange Commission) has launched a task force to address ESG related issues in line with government's sustainability policy
- The Investment Company Institute Board, USA - enhanced ESG disclosures by public companies
- Sustainable Development Goals (SDGs), the United Nations Guiding Principles on Business & Human Rights (UNGPs), are now advocated across the globe
- Introduction of global sustainability disclosure standards IFRS S1 and IFRS S2 by International Sustainability Standards Board (ISSB) to promote the integration of sustainability-related financial information with financial statements.

ESG in India – The Law

- The Securities Exchange Board of India (SEBI) makes it mandatory for the top 1000 listed companies (by market capitalization) to furnish a Business Responsibility and Sustainability Report (BRSR) based on the 9 principles of the Indian government's National Guidelines on Responsible Business Conduct.
- Market regulator SEBI has introduced a reasonable assurance requirement for select KPIs of ESG (BRSR CORE) in a phased manner to the listed entities.

ESG & You

Sustainable ESG strategies increase business resilience and help improve overall company performances

- Stakeholders such as customers, employees, shareholders, vendors, investors, etc. want to know about the company's ESG efforts.
- Attracting top talent at operational or board level now requires a strong ESG positioning
- Strong ESG positioning leads to preferential treatment from investors
- ESG has direct impact on your business valuation – over 25% of listed companies globally are ESG rated
- The BP oil spill and Volkswagen emissions scandal proves that public and media scrutiny on a laggard ESG performance can seriously damage your valuation, brand and reputation

ESG and Business Valuations

Based on the ESG Assessment, primarily the compliance check, our teams re-work the impact on the business valuation. There are prescribed guidelines to valuation calculations incorporating the ESG impact when using valuation techniques like cost approach, sales comparison approach, income approach, etc. Our teams are well geared and understand the impact of identified ESG gap on the business valuation.

Benefits of ESG Valuation

- Facilitate better negotiation by integration of ESG factors into M&A price & Share Purchase Agreement
- PE/VC funds get investee companies that perform better in the long run including offering a higher return on capital, stronger value creation and better management of longer term risks
- Companies with ESG valuations get larger access to a larger pool of investors including ESG focused funds, sustainability funds and impact funds etc.
- Better risk management and better performance for ESG compliant investments

ESG Roadmap

ESG Services/Due Diligence

ASA's ESG advisory team assists companies in formulating an ESG framework and strategy post a diagnostic check in line with global best practices and also offers impact assessments for strategic investors on targets to check for non-compliance with regulatory and non-regulatory ESG parameters.

Our phase wise approach to ESG compliance

	Phase 1	Phase 2	Phase 3
Objective	Compliance with ESG regulatory requirements	Building the ESG framework	Consolidating ESG into mainstream business strategy
Activity	<ul style="list-style-type: none">• Assess current status of ESG compliance• Document / Information Review• Preliminary identification of potential risk factors• BRSR reporting• BRSR Core assurance	<ul style="list-style-type: none">• Establish ESG framework• Compare to industrial/ sector specific best practices• Identify obvious ESG deviations• Communicating to stakeholders and staff	<ul style="list-style-type: none">• Design an ESG Management System• Form an ESG committee• Integrate ESG culture into corporate structure• Define monitoring capabilities with robust controls, processes and governance• Communicating to stakeholders and staff
Deliverables	<ul style="list-style-type: none">• ESG Compliance Review Report• Reasonable assurance report on ESG Core KPIs.	ESG Assessment Report	ESG MS with a Monitoring Mechanism
Timelines	2-4 weeks	4-6 weeks	Quarterly / Bi-Annual

Benefits of an ESG Assessment

- Reduce operational cost by lower energy consumption
- Helps boost top line growth by manufacturing sustainable products
- Identify potential risk and material issues for the buyer or investor
- Flagging community / labour issues
- Improve favorable ranking and reputation amongst customers, suppliers and regulators
- Asset optimization by allocating capital to more sustainable plant and equipment
